

## Wrap text automatically

1. In a worksheet, select the cells that you want to format.
2. On the **Home** tab, in the **Alignment** group, click **Wrap Text**

### Notes

Data in the cell wraps to fit the column width. When you change the column width, data wrapping adjusts automatically.

If all wrapped text is not visible, it may be because the row is set to a specific height.

### How to adjust the row height

1. Select the cell or range for which you want to adjust the row height.
2. On the **Home** tab, in the **Cells** group, click **Format**.

3. Under **Cell Size** , do one of the following:

To automatically adjust the row height, click **AutoFit Row Height**.

To specify a row height, click **Row Height**, and then type the row height that you want in the **Row height** box.

## Enter a line break

To start a new line of text at a specific point in a cell, double-click the cell, click the location where you want to break the line in the cell, and then press ALT + Enter

then press ALT+ENTER.
